

Junior Software Test Engineer

*If you're a recent graduate, or in career transition,
looking to start a career in the software industry, this is the job for you!*

We're looking for a motivated Software Test Engineer to join us in building world-class customer-focused software. In this role, you will be a technical influencer in our quality team who needs to grant technical testing knowledge.

You'll join a cross-functional team composed of Business Analysts, Developers and Project Managers. Your profile will be technically oriented with a passion for testing.

Working as a Software Test Engineer

- This position is responsible for assisting in the overall testing effort planning and effort estimation; overseeing the execution of tests according to approved test plans and deployment schedule; leading, guiding and monitoring the analysis, design, implementation, and execution of the software test cases, test procedures and test suites.
- Review existing processes to identify improvement areas and implement best practices.
- Contribute to robust, scalable, and reliable test automation solutions to improve test efficiency.
- Contributes to the tactical and strategic planning for future quality programs.
- Invent elegant solutions and eliminate roadblocks.
- Regular reporting to PMO & Quality Department
- Collaborate with business and technical teams to solve complex problems.
- Work with IT Architects and PO to define and execute effective testing methodologies and QA best practices to ensure high quality deployments in suitable timeframes.
- Work hands-on directly and/or guide the development Team, plan, and execute test strategies and test cases based on functional specifications, user stories and acceptance criteria.
- Build strong relationships with business and product development stakeholders to understand the needs for the QA roadmap.
- Identify a strategy for establishing and maintaining consistent quality assurance environments and hardware to support testing.
- Measure and report on quality assurance metrics on a regular basis.

ABOUT GAMBIT

Gambit Financial Solutions is a European leading expert in Investment Advisory, Risk Management and Portfolio Optimization. It was created as a spin-off of HEC-Liège (Management School of the University of Liège).

While keeping strong ties with HEC as the motor of its R&D efforts, Gambit has evolved into a full-fledge commercial company. It has developed an international client base and implemented its solutions in various recognized financial institutions in Belgium, Luxembourg, France, Switzerland and beyond. Each of those solutions was built on strong expertise in IT and financial knowledge, and with client-centricity as a constant redline.

- Communicates quality information throughout the organization.
- Ensures near-zero defect seepage rate into production implementations of software products.
- Stays current with process-related industry standards.

What we expect from you

- Hold a bachelor's degree with a strong interest in software development.
- Good communication skills with the ability to influence without authority.
- Rigorous and organized.
- Teamwork and collaboration.
- Ability to thrive in a dynamic, collaborative, and challenging environment.
- Problem-solving.
- Analytical thinking.
- Fluent in French.

Offering

- A full-time contract with a competitive remuneration package with fringe benefits (e.g., car, fuel card, bonuses, insurances, phone subscriptions, meal vouchers).
- A dynamic SME work environment with enthusiastic and talented colleagues.
- The opportunity to work on your own initiative in a fast-growing SME in a dynamic field (FinTech)
- A varied working environment with a lot of room to be innovative and creative.
- Fantastic career development opportunities as we keep growing.
- Flexible working environment with home-working policy
- Extra benefits such as a fitness room access

Work location

- HQ: 36 Rue de Mulhouse, 4020 Liège
