

# Cyber security Analyst

**Gambit Financial Solutions**, a leading European FinTech company, is looking for a Senior Cybersecurity Analyst to strengthen our dynamic team.

## Your Role:

As the first line of defense, you will be responsible for:

- Continuously monitoring our security environment (EDR, firewalls, DLP, etc.) and proactively identifying potential threats.
- Deeply analyzing security incidents, correlating events, and implementing rapid corrective measures (levels 1 and 2) to minimize risks.
- Maintaining and improving our existing security tools and processes.
- Actively participating in the implementation of new cybersecurity projects, in collaboration with technical and business teams.
- Writing clear and concise analysis reports for management and technical teams.

## Your Profile:

- Significant experience (5+ years) in a similar role, with a deep understanding of information systems and cyber threats.
- Proficiency with security tools (XDR, PAM, IAM, SIEM, SOC, DRP, CVE, DLP, MFA) and security methodologies.
- Strong data analysis and problem-solving skills.
- Practical experience in maintaining and evolving security architectures.
- Fluent in English (written and spoken) and French (at least spoken).
- Team spirit and ability to work independently.

## What We Offer:

- A stimulating work environment within a growing company.
- Continuous professional development opportunities.
- An attractive salary package and interesting social benefits (company car and fuel card).
- A flexible organization promoting remote work.

**Location:** Rue de Mulhouse 36, 4020 Liège, Belgium

## How to Apply:

Apply now via LinkedIn or send your CV to [hr@gambit-finance.com](mailto:hr@gambit-finance.com).
